### Subaru Symmetrical All-Wheel Drive

Standard

Standard

Standard

Standard

Standard

### X-MODE<sup>3</sup>

① X-MODE optimizes engine output and transmission ratio, increases all-wheel drive system engagement and uses enhanced control of the VDC system to reduce individual wheelspin, providing optimal traction on low friction surfaces. Sport models include dual-function X-MODE with Deep Snow/Mud setting. Requires CVT.

Optional

Optional

Standard

Standard

Standard

### Hill Descent Control (HDC)<sup>3</sup>

① X-MODE also incorporates Hill Descent Control (HDC) that helps to maintain a constant vehicle speed when traveling downhill, enhancing vehicle control.

Optional

Optional

Standard

Standard

Standard

### Vehicle Dynamics Control (VDC)

① Standard VDC electronic stability control utilizes sensors that constantly monitor wheel speeds, steering angle, brake pressure, vehicle yaw rate and lateral g-forces. If VDC detects a difference between the driver's intended path and the one the vehicle is actually taking, VDC applies braking power and/or reduces engine torque to help correct vehicle path.

Standard

Standard

Standard

Standard

Standard

### Traction Control System (TCS)

① VDC also incorporates an all-wheel, all-speed traction control system that senses a loss of traction and applies braking force to the slipping wheel or wheels as necessary to maintain vehicle motion.

Standard

Standard

Standard

Standard

Standard

### Active Torque Vectoring

① Active Torque Vectoring works in tandem with VDC, applying braking power to the inside front wheel resulting in better handling, sharper turn-in, more neutral steering, and higher cornering limits while turning.
