Stability and Traction**Subaru Symmetrical All-Wheel Drive**

Standard Standard Standard Standard Standard Standard Standard Standard

X-MODE®

① X-MODE optimizes engine output and transmission ratio, increases all-wheel drive system engagement and uses enhanced control of the VDC system to reduce individual wheelspin, providing optimal traction on low-friction surfaces. Onyx Edition, Limited, Onyx Edition Limited, and Touring models include dual-function X-MODE with Snow/Dirt and Deep Snow/Mud modes.

Standard Standard Standard Standard Standard Standard Standard Standard

Hill Descent Control (HDC)

① X-MODE also incorporates Hill Descent Control (HDC) that helps to maintain a constant vehicle speed when traveling downhill, enhancing vehicle control.

Standard Standard Standard Standard Standard Standard Standard Standard

Vehicle Dynamics Control (VDC)

① Standard VDC electronic stability control utilizes sensors that constantly monitor wheel speeds, steering angle, brake pressure, vehicle yaw rate, and lateral g-forces. If VDC detects a difference between the driver's intended path and the one the vehicle is actually taking, VDC applies braking power and/or reduces engine torque to help correct vehicle path.

Standard Standard Standard Standard Standard Standard Standard Standard

Traction Control System (TCS)

① VDC also incorporates an all-wheel, all-speed traction control system that senses a loss of traction and applies braking force to the slipping wheel or wheels as necessary to maintain vehicle motion.

Standard Standard Standard Standard Standard Standard Standard Standard

Active Torque Vectoring

① Active Torque Vectoring works in tandem with VDC, applying braking power to the inside front wheel resulting in better handling, sharper turn-in, more neutral steering, and higher cornering limits while turning.

Standard Standard Standard Standard Standard Standard Standard Standard

Trailer Stability Assist (TSA)

① Trailer Stability Assist senses any unsafe yaw conditions and automatically applies braking to specific wheels to help driver maintain vehicle control.

Manufactured by Sleepypod® and uniquely designed in signature Subaru blue, your dog will travel in safety and style. Crash-tested at child safety seat standards and certified by the Center for Pet Safety for dogs from 18 to 90 pounds. The harness is also designed for use outside of the vehicle as a walking harness with double "D" ring connection to affix a leash and reflective strips and logo for improved visibility at night. To determine the correct size harness for your dog, measure around the ribs just behind the front legs with a flexible cloth tape measure. Measurements for Medium Harness: 22.5" - 28".
